TI - Liquid storage pouch for e.g. detergents, shampoos, beverages, liquid seasonings  
AB - JP2000043902 NOVELTY - A spout (12) is provided in the upper corner of a liquid storage pouch (10A). A recess (14) is formed at the edge (10a) along the lower side of the spout. A dome-shaped forming component (16) is pushed towards the spout by the liquid flow induced along the periphery of the inner end (16a) of the component using a seal portion (18) bonded near the vicinity of the inner end of the component.  
- USE - For e.g. detergents, shampoos, beverages, liquid seasonings  
- ADVANTAGE - Stabilizes pouring of liquid and prevents liquid spills by forming recess to edge in lower side of spout. Guarantees smooth liquid flow.  
- DESCRIPTION OF DRAWING(S) - The figure shows an explanatory view of the liquid storage part.
